**Re: WC Docket No. 10-90, GN Docket No. 09-51, WC Docket No. 05-337
Notice of *Ex Parte* Presentation**

Dear Ms. Dortch:

On October 13, 2010, Joan Johnson and Rusty Moore of Big Bend Telephone Company (“Big Bend”), John Kuykendall and Marty Klueh of John Staurulakis, Inc. (“JSI”), and Eric Keber of the Western Telecommunications Alliance (“WTA”) met with Zac Katz, Chairman Genachowski’s Wireline Legal Advisor. The Big Bend, JSI and WTA representatives met on behalf of the Border Companies, a group of rural rate-of-return incumbent local exchange carriers (“ILECs”) who operate in U.S. border areas comprising approximately 50% of the total border miles on the U.S.-Mexico border.

The subject of discussion was the impact of the National Broadband Plan on the telecommunications and broadband services provided by the Border Companies, including those that are critical to law enforcement and homeland security. A copy of the presentation which was discussed at the meeting is attached.¹

In the meeting, Big Bend representatives explained the challenges unique to the Border Company serving areas which have been very successfully met with the use of fiber in conjunction with other technologies. Also discussed were concerns that the proposed cap on high-cost universal service funds (“USF”) and transition away from rate-of-return regulation would have a disastrous effect on the Border Companies which rely heavily on current USF support to maintain and upgrade the core telecommunications and broadband network for services vital to U.S.-Mexico border security agencies and anchor institutions.

¹ Also provided at the meeting were Comments of The Border Companies, GN Docket No. 10-90, GN Docket No. 09-51, and WC Docket No. 05-337, filed July 12, 2010.

Impact of the FCC's National Broadband Plan by the Border Companies

October 2010

FCC Ex Parte Presentation

1

Big Bend
TELEPHONE COMPANY

Who We Are

- The Border Companies are rural incumbent local exchange carriers (RLECs) who provide high-quality telecom and broadband service in their geographic study areas.

- These companies are:
 - Big Bend Telephone Company (TX)
 - Valley Telephone Cooperative, Inc. (TX)
 - Dell Telephone Cooperative (TX)
 - Alenco Communications, Inc. (TX)
 - Border to Border Communications, Inc.(TX)
 - Southwest Texas Telephone Company (TX)
 - Riviera Telephone Company (TX)
 - Valley Telephone Cooperative, Inc. dba Valley TeleCom Group (NM and AZ)
 - Tohono O'odham Utility Authority (AZ)
 - Table Top Telephone Company, Inc. (AZ)

4

Where We Serve

- In total, we serve 984 miles of the 1,954 miles that comprise the entire U.S.-Mexico border - approximately 50% of the total border miles
 - Of note, Big Bend's service area includes 485 miles of the Texas-Mexico border which is more than the border miles for the entire state of Arizona

4

- ❑ All of the Border Companies provide critical services including high capacity circuits, high speed broadband and voice services to federal, state and local border security and emergency institutions in the most remote areas of the border

Big Bend
TELEPHONE COMPANY

Our Concerns

- In comments filed before the FCC, the Border Companies demonstrate that:
 - the companies rely heavily on current high-cost universal service funds (USF) to maintain and upgrade the core telecom and broadband network for the services they provide to vital U.S.-Mexico border security agencies and to anchor institutions

- the proposals in the FCC's National Broadband Plan to cap current high-cost support and to cut support by requiring transition away from rate-of-return regulation would be disastrous and contrary to the public interest

Big Bend
TELEPHONE COMPANY

Rate-of-Return Does Not Lead to Inefficiencies

- There are no guarantees that a carrier will accomplish its financial goals or achieve its permissible rate of return without prudent management and efficient business decisions that are stringently reviewed by state and federal regulatory bodies as well as rate-of-return regulated companies' lenders, members, owners, and boards of directors

- RLECs are essential members of their communities with keen desire and interest in operating efficiently for the betterment of their customers who are also their friends, neighbors, and in some cases, shareholders or cooperative members
- RLECs continue to explore and implement the most efficient technologies

Big Bend
TELEPHONE COMPANY

- Use of fiber in RLEC's networks is not inefficient
 - The Border Companies partner with law enforcement to secure the border and law enforcement requires high-speed and reliability that only fiber can provide
 - RLEC's deployment of fiber forms the "core" network
 - The more rural the area, the more appetite for bandwidth
 - More efficient to deploy fiber to meet the increasing demands of the future

11

Conclusion

The FCC should enact any modifications to existing USF mechanisms in a thoughtful and reasoned approach, considering the proven success that has resulted from rate-of-return regulation.

11

The Border Companies remain committed to fulfilling consumer demand for broadband as well as supporting the very critical role of numerous agencies whose job is to ensure the safety of all Americans through border protection

Who We Are

The Border Companies are rural incumbent Local Exchange carriers (RLECS) who provide high-quality telecom and broadband service in their geographic study Areas.
